©2007, Gardensheds Inc.

Our Sconset Cottage® is a recent addition to the Gardensheds Collection™. This original design, with its distinctive cedar shingle siding, nautical windows, and low-profile standing seam copper roof, takes its visual cues from classic Eastern Seaboard architecture. Its timeless form compliments a variety of residential styles, from traditional to contemporary. A handcrafted 5" turned-cedar ball brings a distinct accent to the copper roof peak. The cottage is suitable for a variety of uses: writer's retreat, pool house, tennis court pavilion, outdoor dining pavilion, or garden house. Custom 6'-6" mahogany French doors are paired with screened and fully vented louver cedar shutters to allow for a gentle country or seaside breeze to circulate. The interior features an elevated 12" perimeter book ledge suitable for a library or display of small objects. Flooring is a choice of mahogany or white oak, either of which can be stained, painted or finished with a stencil pattern. For a more fully finished interior, hardwood bead board paneling or our comprehensive electric package are available upon request.

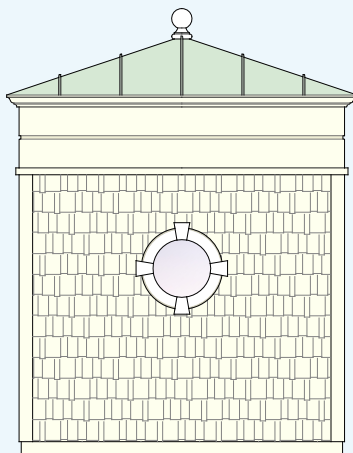

The Sconset Cottage® is constructed in our Pennsylvania workshop with an unrivaled level of material and craftsmanship, for which all Gardensheds® products are known.
