“Well, there is nothing else to say but that she is spectacular. Like a wonderful wooden boat, she deserves a name, and I guess it will be Belle until we think of something better. I love the clean smell of new wood and the freshness of her. I hope I can keep her in the manner that she deserves. I may have to get all new garden tools to be worthy of being stored there. There is a saying I can't quite remember exactly, but the essence of it is that "the joy of good quality lasts long after the thrill of a bargain price is gone." When I add up what I've spent on her, it's nearly indecent, but I LOVE her and will just never discuss with anyone how much it ended up costing. She looks fabulous and the space inside is huge, relative to a rectangular building of the 8'6" by 8'6" which is her core. Everything just works, and it is a pleasure both to look at her from my bench outside the house and to be inside her waiting for the planting season to come. I'm glad that I'll have the chance to claim my space before my husband starts bringing in saws, vises and power tools!! I don't think I've ever had such a delightful place to store my garden things, nor to work on planting. In short, I am absolutely thrilled! Thank you for all you've done to bring this day to reality. My very best to you, and good wishes for a Happy Easter.”

“Our Williamsburg Classic garden building arrived yesterday evening. Keith did an outstanding job of moving and setting the building! He is quite adept at his job and a personable young man, too. The building is absolutely wonderful. One of your references that we called told us it's “more like a piece of furniture than a building” and he is right. Keith said Gardensheds are the “Cadillac” of garden buildings—how true!! We really enjoy it being part of our back yard.”

Thank you for a job well done from beginning to completion!”

“Hi Ken, I just had my flower garden planted, it looks great. We had a huge graduation party for Sarah and everyone loved the Gardenbelle! I love to show it off!”
