Our original Greenhouse is a model of form and function we've been building and perfecting for more than a decade. Intended for those who are passionate about gardening and architecture, every detail has been thoughtfully considered. A profusion of natural light filters inside from well-proportioned fixed skylites and operable screened windows.

A standard 10' x 16' building includes a total of six 9-lite mahogany windows and three skylites; the number of windows and skylites vary according to building width and length. The workbench, which typically runs the full length of the multi-window wall, provides generous space for craft materials. An integral lower shelf and optional drawers provide additional space to organize materials. Our optional galvanized zinc countertop and backsplash, a feature unique to Gardensheds®, makes for an ideal, easy to clean and maintain work surface.

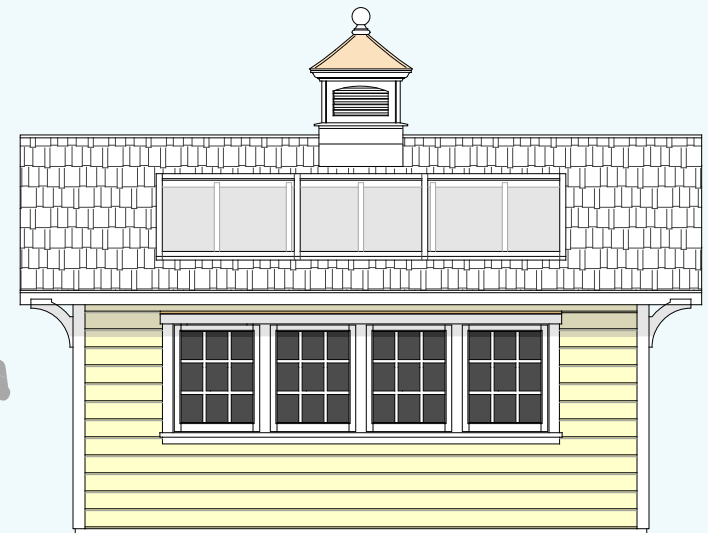

Overhead, exposed roof beams provide a convenient place from which to hang an assortment of baskets and flower pots. Our generous 9/12 roof pitch allows for an optional storage loft. Wall-mounted shelving and tool racks provide further functionality. An optional pre-wired interior electric package includes wall switches, wall outlets, counter-top outlet strips and overhead fluorescent lighting. For a fully finished and inviting appearance, we recommend a painted or stained interior. Our standard flooring, unique to Gardensheds®, is solid white oak hardwood that can be left unfinished, stained, or painted in a variety of stencil patterns. Alternate flooring options are available upon request.

Exterior siding options include our standard horizontal cypress with bead detailing, Board & Batten, or cedar shakes. Standard roofing is western red cedar shingles. Alternate roof materials include standing seam tin or copper. A selection of both single and double doors are available. The Vineyard Greenhouse® is offered in a variety of sizes. For those who desire a separate storage space, Gardensheds offers a wide selection of interior partition options.
