No building evokes wistful memories like the Gardenbelle—one of our most popular models. Hexagonal in form, with a classic “Bell” roof accented with dentil molding and custom 48” ball and spear turned finial, this design is rooted in tradition. This versatile structure is equally at home in garden and pool settings as well as parks and resorts. A variety of interior configurations are available to suit your needs, that include wrap-around workbench and shelving. The two standard windows, constructed of mahogany with divided lites and copper drip caps, are typically placed on either the two front sides, or the two rear sides. If desired, additional windows can be ordered. We offer a selection of three doors, each of which will impart a different personality to your Gardenbelle: French Door, Raised Panel Door, and Chevron Door. Full length shutters or wall-mounted light fixture are also available to dress the doorway entry. Building arrives fully assembled and finished, ready to enjoy years of enjoyment!

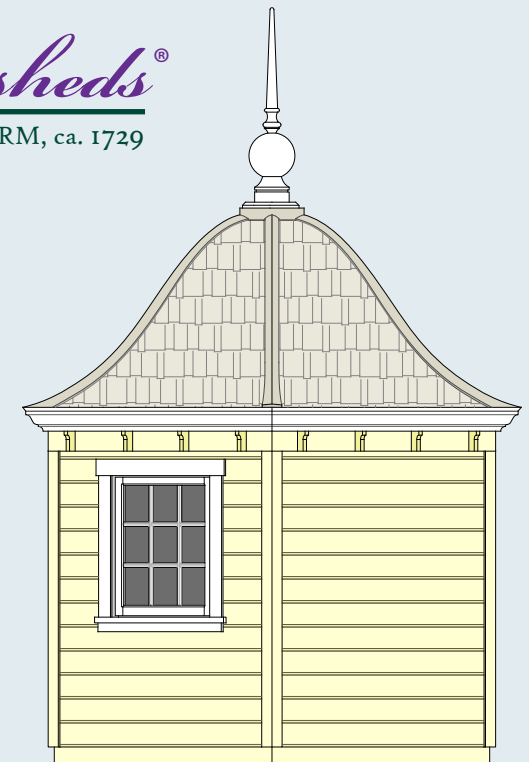

A smaller version of the Belle, measuring 8’-6” x 6’, is also available.
