

**The soul of an outbuilding**

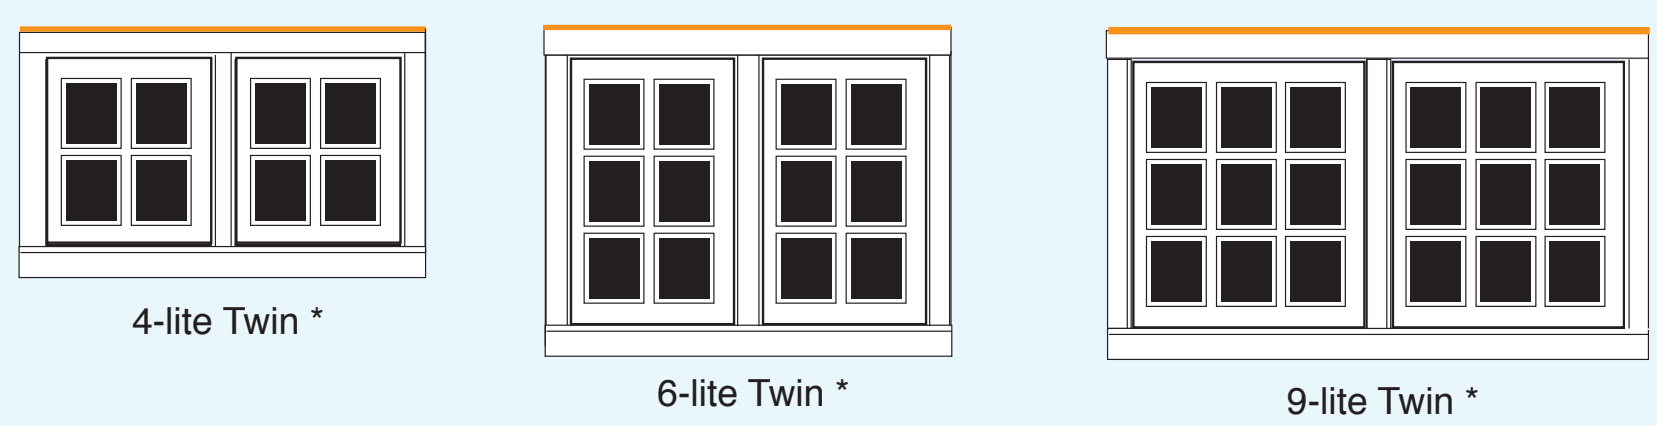

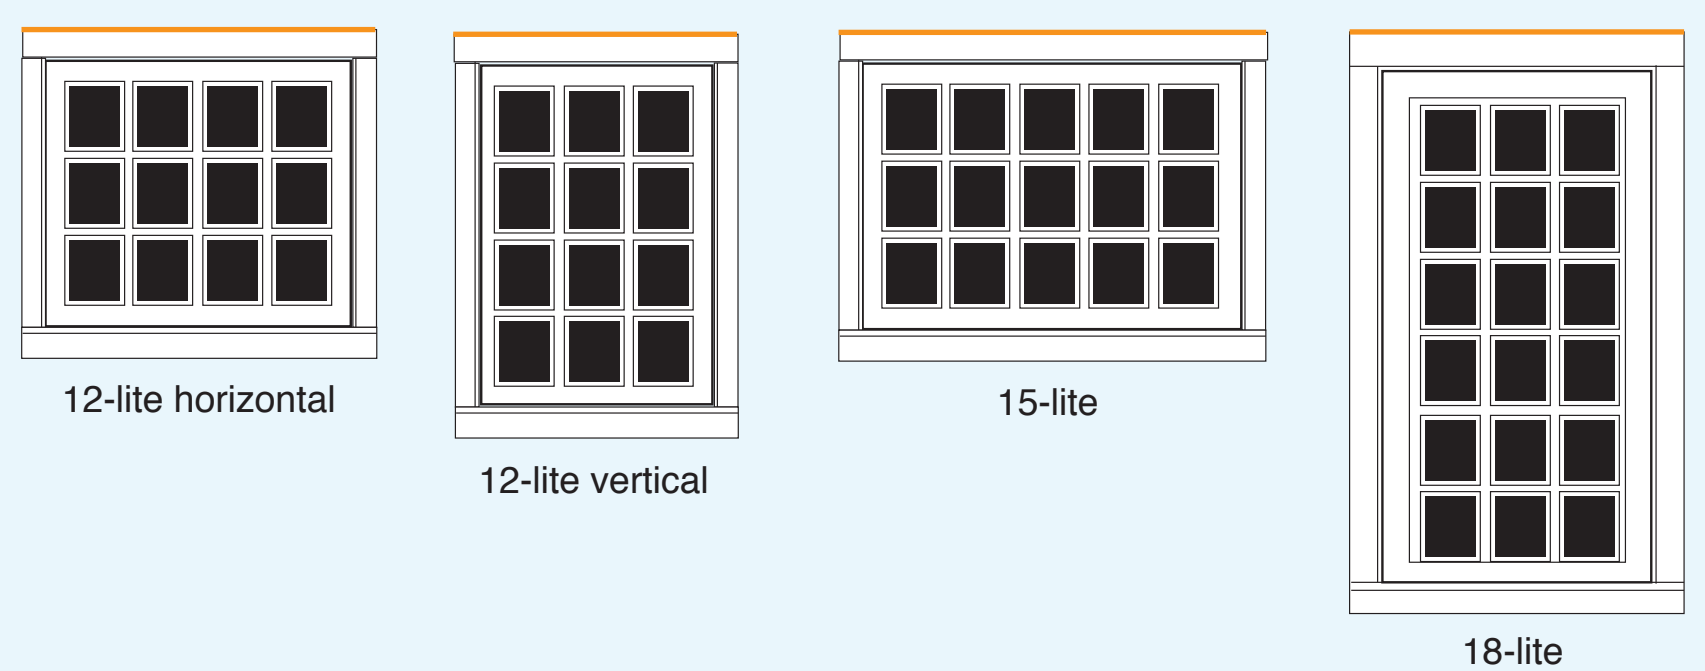

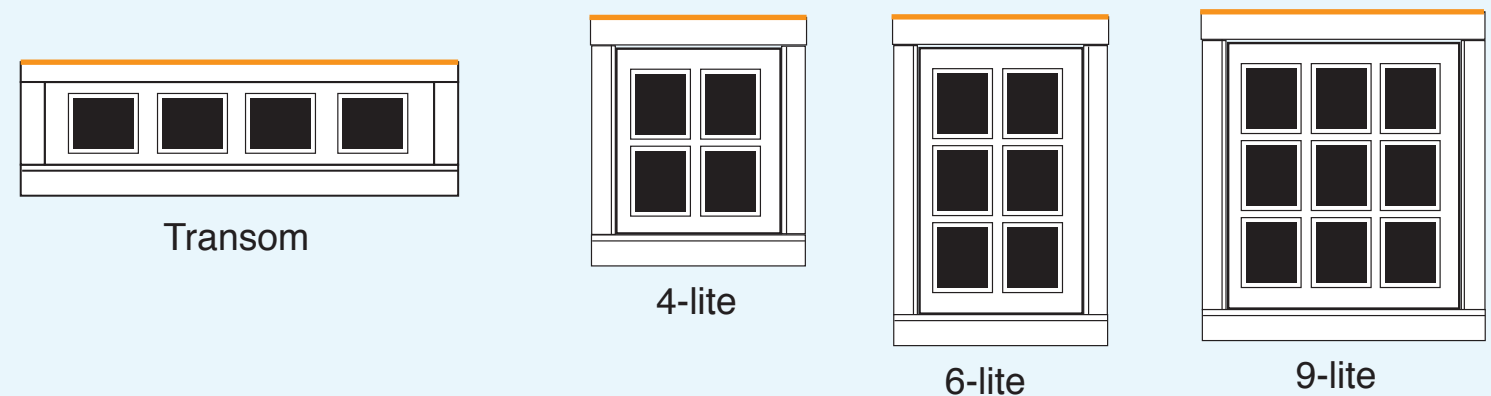

If eyes are the window into the soul of a person, we believe that windows are the "eyes" into the heart of an outbuilding. For us windows are an integral and signature component of our buildings. Because scale and craftsmanship are so critical to the overall look and design of our buildings we fabricate our traditional awning-style windows and proprietary hardware in-house. No short cuts. No compromise. This approach also allows different styles from our window library to be mixed together in one building for a uniform and consistent aesthetic pattern. Our windows are crafted of sustainably harvested wood with mortise and tenon joinery. Window features includes profile muntins, true divided lites, tempered glass, weather seal, and copper drip caps. We recommend enhancing the functionality of your windows with our optional wood frame screens.

**Signature Door Features**

- exclusive in-house design & construction
